

# T13A BEAGLE Meeting Minutes

Date:16/10/21

**Attendees:**

Krishen, Johnie, Haokai, Dylan, Lawrence

**Agenda Item:**

Going through iteration2 implementation details regarding tokenisation and persistence and discussing group progress

**Discussion/Conclusions:**

- Store secret in data store
- Pickling our data store to store data persistently:
  - When to pickle our data?
    - Could pickle at the end of each function
- What to pass in our token:
  - User\_id
  - Password
  - session\_id
- To check valid token:
  - Ensure valid u\_id in {users:}
  - Auth\_login but for hashed passwords to check if password is correct
  - Check session id in session list
- Ways to generate an invalid token:
  - Change the last letter of a current token, loop through all tokens to ensure its not a valid token
  - Or use empty string “ ”, assuming no token would just be an empty string
- Increase standups for every two days starting monday
- Move meeting to Thursday instead of Saturday
- Meeting on Tuesday at usual tutorial time
